

Python Course

Hw # 3

Deadline: Thursday, 9/14 5:30 pm

1. Go through exercises 8 (Optional. Recommended if you missed class or you need more practice)
2. Exercise 14: Go over the exercise 14 from the book. Using the exercise's format, complete the following exercise
 - a. Write a program that at least two arguments other than the script itself
 - b. Create a minimum of 4 questions for users to answer
 - c. Use `input()` to get answer from the user for each question
 - d. Use the questions you created and user's answers to write an interesting paragraph

NOTE: You are free to use any questions for the user and use it to create a short story or a paragraph.

3. Exercise 15
4. Practice the following commands
 - a. `cat`
 - b. `less`
 - c. `grep`
 - d. `Find`
 - e. `Touch`

After you practice these commands, use the commands using your terminal, take a screenshot and add it to a text file for submission

Submission: Before 5:30 pm on thursday, push your code to your github and send me your git link on slack or email (szaman@perscholas.org)

Note: I should be able to see the submission time on your github. If it's past 5 30pm on thursday you won't get full credit.
